

Module name and code	Graphic Design 4GPDS001C
CW weighting	40%
Lecturer setting the task with contact details and office hours	Said Abduvaliev sabduvaliev@wiut.uz, Mondays 11:00-12:00
Submission deadline	06-03-2026
Results date and type of feedback	20-03-2026
The CW checks the following learning outcomes:	
1. Demonstrate fluency in the vocabulary relevant to graphic design and its history. 2. Apply basic design principles to visually present ideas, information, products, and services. 3. Use modern graphic application in creation, reproduction, and distribution of visual messages. 4. Discuss design history, theory, and criticism from a variety of perspectives, including art. history, communication/information theory, and the social/cultural use of design objects.	

Task

This is an individual portfolio assessment. You will produce a design (poster, campaign) for a given topic and justify your design decisions. All works must be submitted through WIUT Intranet's online assessment submission functionality.

In this task, you will produce a poster (70%) and a report (30%). You will take a topic from the list below depending on the last number of your student ID. You are NOT allowed to choose any other topic. **Choosing another topic will result in 0 marks.**

Once you have identified your topic, formulate the main message you would like to deliver. With a clear message in mind, design a poster around that message and make sure your design clearly delivers it. You must apply several design principles (minimum 3) in your work to make it look appealing, effective, and easy to read.

Finally, produce a short report listing design principles that you have used and explain exactly why. Maximum word count: 1000 words.

Please note that your mark will reflect how much effort you put into your work. Make sure to show all Adobe Photoshop software skills that you have learned. Use adjustment layers, blending modes, masks, filters, etc. Basic designs achieved by simply putting several images together will get pass mark only.

Description

You **must choose one of the topics below** depending on the last digit of your Student ID:

Student ID last digit	Topic
0	Poster for some event
1	Banner for a restaurant
2	Banner for a charity or NGO
3	Movie poster
4	Poster for a school
5	Poster for a travel agency
6	Magazine cover
7	Restaurant poster
8	Technology magazine cover
9	Social Awareness Campaign

For example, if your student ID is 16123, you must produce “Movie poster” (because 16123 ends with “3”). If you choose any other topic, you will automatically get 0 marks for this assessment component.

Formulate a related message. For example: if you were to choose “Charity”, you might find data that suggests “[a child under 15 dies every 5 seconds around the world](#)”. I can build on this message and call for action (e.g., Donate).

While designing your poster, please apply several design principles (Hierarchy, balance, space/negative space, Rule of Thirds, etc.). Make sure your design helps users to easily navigate through your design/message and understand it easily.

You need to put an effort into your work. Do not simply put several images from the internet and a text. Create collages, process photos, create something original.

Finally, write a report with a list of all the design principles used in your work and explain how/why did you use them. What were the goals behind using any given principle?

Marking schema

Design/Poster (70%)

Your poster will be evaluated according to the following criteria:

- **Appeal (7 marks)** – Overall look and feel. Does overall look and feel align with the main message? Does it look appealing? Does design have balance?
- **Colour scheme/harmony (7 marks)** – Choice of colours. What colour harmony was chosen? Are colours used effectively?
- **Design principles (7 marks)** – Effective use of design principles. Were design principles effectively used to achieve the goal? Overall design is well balanced, positive and negative spaces used well, there is a clear hierarchy.
- **Complex & finished (14 marks)** – Is it well done? Does it look clean (for example selections are clean, etc.)? Does it look professionally done? Is design complex?
- **Complex use of software and effort (35 marks)** – Effective use of software (Adobe Photoshop). Complex use of selection, masking, colour adjusting, blending modes, filters and others. Student did not simply copy several images and put them into the poster without any further processing. Student put effort in every aspect of the design.

For example, instead of just copy pasting an image of a person in a climate change poster, you could manipulate it further like so:

Figure 1. Example of adding complexity and showing extra effort.(Source: [PetaPixel](#))

Note: You do not need to manipulate all your design elements.

Report (30%)

Your report must include the following:

- **Your cause (3 marks):** State your cause and the message you are trying to put forward in your design. What is the main goal/message behind your design?
- **Design principles (27 marks):** What design principles did you use in your design? Explain how you used it and why you used it? Justify your design decision. Make sure to back them up with principles and other rules of good design. What was your goal in using any given design principle? At least 3 design principles (9 marks each – 3 how it was used, 6 why it was used).

Deliverables

For this task you will produce:

1. Zip file of original poster design files (source format PSD and plain image format e.g., JPEG, PNG, etc. and any other images that were used in the “assets” folder).
 - a. GD_CW2_STUDENTID_Source.psd
 - b. GD_CW2_STUDENTID_Result.jpg
 - c. Assets.
2. Report (in Microsoft Word format).
 - a. GD_CW2_STUDENTID_Report.docx

Submission

You will submit 2 separate files:

1. GD_CW2_STUDENTID_Source.zip
2. GD_CW2_STUDENTID_Report.docx

Your report must be in Microsoft Word file format. Do not archive (zip) your report file.

Submit your file to “Coursework 2” assessment on WIUT Intranet.

Format

- Word-processed Times New Roman/Arial 12pt double-spaced and on A4 paper.
- The footer should show your ID number and module title.
- Include a contents page giving the headings and page numbers of each section.
- Pages should be numbered.
- Do not submit any loose pages.
- Use Harvard method of referencing.
